The swap pricing methodology reflects a transaction where the Customer sells the amount of metal in the ABC unallocated account and buys the same amount of metal Loco London. The swap charge noted in the Charges will be applied to this transfer as a net amount per fine ounce, payable by the Customer. The standard spot settlement conditions of two Business Days will apply to these transactions unless otherwise mutually agreed</p>
Sample:	The calculation of the ABC Settlement Amount will be determined after treatment and Sampling. Where the Customer requests the Sample be sent to a Third Party laboratory, this will be excluded from the Settlement Amount calculation. If a Customer subsequently requests the Customer Sample or requests the Umpire Procedure, the estimated fine metal content will be deducted from the Customer's Metal Account with ABC and offset against any future delivery
Sampling, Assay & Umpire Procedure:	<p>ABC operates its own laboratory. Incoming Material is vacuum dip sampled while molten to ensure a homogenous sample is taken. 1 sample is taken from each lot of incoming Material (Sampling) and cut into 4 pieces:</p> <ul style="list-style-type: none"> • ABC: 2 pieces are retained by ABC and utilised for analysis by fire assay. The fire assay result (ABC Assay Result) is used for final Outturn and Settlement • Customer: 1 piece to be retained as a Customer Sample for a minimum of 3 months. At Customer request this sample may be sent to a nominated laboratory for analysis. If the Customer assay results are within Splitting Limits of the ABC Assay Result, then the ABC Assay Result to be used for the purposes of Settlement. If results are outside Splitting Limits, then either ABC or the Customer has the right to request an Umpire analysis

- Umpire Sample: 1 piece is retained by ABC as an Umpire sample if required.

If either ABC or a Customer requests an Umpire analysis, an independent laboratory, mutually agreed by both parties, shall be appointed to carry out an Umpire assay on the Umpire Sample.
